## SOFTWARE Engineering

Junior Software developer

---

As a junior software developer with almost two years of experience in the tech industry. He is passionate about continually improving his skills and staying up-to-date with the latest technologies. He has a strong foundation in PHP, Ajax, Javascript and Docker and is now eager to explore new opportunities and expand his skillset by working with Java development. His long-term goal is to become a backend focused full stack developer with expertise in both php and java. He is confident that his technical skills, attention to detail, and passion for learning will allow him to make a valuable contribution to any development team. He is excited to take on new challenges and grow as a software developer.
